PROJECT TYPE: BOUNDARY SURVEY **CLIENT:** KEN DIXON

PROJECT NAME: RESIDENTIAL
BOUNDARY **LOCATION:** ANDOVER, MAINE

DESCRIPTION: Main-Land completed a standard boundary survey of a 100+ acre “range lot” in Andover. The project involved researching deeds and plans dating back to the late 1800’s. Field work was completed using a total station, RTK and static GPS observation and our tracked four wheeler allowed for better efficiency traveling around the site under winter conditions. The purpose of the project was to determine the location of the boundary lines and prepare a new legal description for a proposed conveyance.
