PROJECT TYPE: TOPOGRAPHIC SURVEY

CLIENT: ANDROSCOGGIN HOME
CARE & HOSPICE

PROJECT NAME: ANDROSCOGGIN HOME
CARE & HOSPICE

LOCATION: AUBURN, MAINE

DESCRIPTION: Main-Land completed a topographic site survey of a portion of the Androscoggin Home Care & Hospice Facility, approximately 1 acre, located on Stetson Road in Auburn. The project involved completing vertical and horizontal location to provide 1 foot contour mapping and the location of site features, such as edges of pavement, buildings, curbing, retaining walls, utilities, and fences. This data was compiled into an existing conditions survey plan, which was forwarded to Harriman, to be used as a “base map” for planning and design purposes.

CLIENT QUOTE: “We appreciate vendors and contractors who can meet deadlines and keep projects moving forward. Main-Land Development Consultants identified an approaching winter storm with heavy snow accumulation and blizzard conditions predicted and realized it could delay our topographic survey and associated project by at least several weeks. On their accord, they reached out and accelerated the process to ensure completion of the site work before the storm could negatively impact our project schedule. Main-Land’s staff worked diligently and expeditiously through the early portion of the storm to complete the survey successfully.”

-Steve Doyon, Director of Administrative Services
