**PROJECT TYPE:** TOPOGRAPHIC  
SURVEY

**CLIENT:** SRL ARCHITECTS

**LOCATION:** PARIS, MAINE

**PROJECT NAME:** OXFORD COUNTY  
COURTHOUSE SITE

**DESCRIPTION:** Main-Land completed a topographic site survey and standard boundary survey of the Oxford County courthouse and holding facility, approximately 6 acres, located on Western Avenue in Paris. The project involved completing deed research and field work to determine the record boundary lines of the property, vertical and horizontal location to provide 1-foot contour mapping and the location of site features, such as edges of pavement, curbing, retaining walls, utilities, and fences. This data was compiled into an existing conditions survey plan, which was forwarded to SRL Architects, to be used as a “base map” for planning and design.
