PROJECT TYPE: GROUNDWATER TESTING CLIENT: MATTINGLY PRECAST

PROJECT NAME: MATTINGLY QUARRY LOCATION: NORTH ANSON, MAINE

DESCRIPTION: Main-Land performs on-going groundwater sampling and monitoring for Mattingly Precast in North Anson, Maine. Main-Land's Environmental Scientist, Scott Dixon, uses YSI and Turbidity meters to sample the groundwater and tests for dissolved oxygen content, nitrate levels, conductivity and other measures to determine if the groundwater meets the standards set by the Department of Environmental Protection.
